Most Effective Operation:

1. Hold canister in an upright position with nozzle facing forward. DO NOT cover nozzle.
2. Place finger or thumb under flip-top safety cover.
3. Press down actuator to fire.
4. Aim for the face (eyes especially) and continue spraying until threat ceases.
5. Remove finger or thumb to safety position.

Proficiency in the use of Presidia Gel[®] or any other Reflex Protect[®] non-lethal self-defense product is improved by routine practice. Inert Training Units are available for purchase for all types of Reflex Protect[®] products.

Training in best practices for the use of Reflex Protect[®] and anti-violence safety preparedness in general is available at ReflexProtect.com and highly recommended to enhance proficiency as well as peace of mind.

KEEP OUT OF REACH OF CHILDREN. DO NOT STORE IN VEHICLE.

DO NOT attempt to use after expiration date.

The use of this product or device for any purpose other than self-defense is a crime. Not for use on animals. Contents are dangerous. Use with care.

FIRST AID (In Case of Accidental Deployment)

If available, application of Reflex Remove[®] CS/OC decontaminant as directed has proved highly efficacious in providing relief from the effects of Presidia Gel[®] and other non-lethal self-defense chemical agents. Visit ReflexProtect.com/ReflexRemove for more information.

In the absence of Reflex Remove[®], best practices for decontamination involve flushing the affected areas thoroughly with copious amounts of fresh water. DO NOT directly rub, wipe, or otherwise contact the surface of the eye (except for flushing), as injuries can arise due to such direct contact or the application of salves, creams, oils, or lotions, except under the direction of a physician.

If symptoms persist, seek medical assistance.

Active Ingredient: 2% Chlorobenzalmalononitrile (CS)
